

Our events help children of all ages from reception to A Level get a buzz from playing detective, whilst developing their vital science skills in fun and interactive ways.

Learning objectives are aligned to National Curriculum specifications in science, and are age and ability specific.

KS2 - A level
Full or 1/2 day workshops
Science week
Yr 6 transition / outreach
Weekly Detective Clubs
Stretch & challenge workshops
Holiday clubs & youth groups

FREE assembly session to all schools. Contact admin@thedetectiveproject.co.uk for further info.

Children's parties for girls and boys age 7+

Our workshops encourage cross curricular study (english, history, geography, languages...)

We run INSET / team building workshops for staff too, why let the children have all the fun?

The Detective Project

Testimonials

'Thank you so much for your efforts last night, we were absolutely delighted with the event.'
S Umbo, Science Museum London

All the staff that I have spoken to have been full of enthusiasm and praise for your sessions and we may well be interested in a repeat or similar performance in the future. Once again, many thanks for a good job well done.

S.Wynn, Millfield Prep School

TDP morning was fabulous. The "trainers" were really great with the children, it was all well planned and organised. We got lots out of it and much more discussion to come!!!
Sian Bournville Primary School

The Detective Project comes out as favourite on quite a few of the children's feedback forms. We were really pleased with how the week went
K Patterson, Backwell school
